EDUCATION

Bachelor of Technology in Computer Engineering

Gyanmanjari Innovative University

📅 07/2024 - Present

SKILLS

Frontend Technologies	HTML, CSS, JAVASCRIPT
Database	MySql
Programming Languages	JAVA , C, C++ , Python
Version Control	Git, Github

PROJECTS

tic-tac-toe

A Tic Tac Toe game in JavaScript typically consists of a 3x3 grid where two players (or a player and computer) take turns marking empty squares with "X" or "O". The game starts with an empty grid and players click on a cell to mark their turn. The JavaScript code tracks each move, checks for a winning combination (three marks in a row, column, or diagonal), or a draw if all cells are filled without a winner. The game displays a message when a player wins or if it's a tie, and offers an option to restart. JavaScript handles the game logic, while HTML and CSS provide structure and styling for the grid.

weather

A Weather Webpage using JavaScript allows users to view the current temperature for any city they enter. The webpage has a simple input box where users type a city name and click a "Get Weather" button. Using JavaScript, the app fetches real-time weather data from an API (like OpenWeatherMap) and displays the temperature, along with other details like weather conditions, humidity, or wind speed if desired.

Currency Converter

A Currency Converter Webpage using JavaScript enables users to convert an amount from one currency to another in real-time. The webpage includes dropdown menus for selecting the source and target currencies and an input field for the amount to be converted. When the user enters an amount and selects the currencies, JavaScript retrieves the latest exchange rates from a currency API (such as ExchangeRate API), performs the conversion calculation, and displays the result instantly.

Experience

Freelance Web Developer

Saturn Tiles Website

- Developed a responsive website using ReactJS to showcase products and services.
- Ensured cross-browser compatibility and mobile optimization for a seamless user experience.

Internship at Meetanshi, Bhavnagar Gujrat

Web Development Intern

- Participated in a 6-week remote web development internship program.
- Worked on projects using HTML, CSS, and JavaScript.
